Life Is On | Schneider Electric

...SUSTAINABILITY READY

Contribute to a better world — with Master**Pact** MTZ circuit breakers you can enhance sustainability.

Build superior sustainable and efficient properties by reducing CO_2 emissions, utility and operating costs as well as improving the well-being of property occupants for both new construction and renovation projects.

Green Premium™

Experience the difference today at schneider-electric.com/green-premium

Achieve Green Building certification with Master**Pact** MTZ:

In compliance with ISO 14025 PEP Ecopassport program, Schneider Electric publishes a comprehensive Life Cycle Analysis of our product, providing the environmental data you need to achieve Green Building certifications.

For example, MasterPact MTZ contributes to 4 LEED™ points:

- Building Product Disclosure and Optimization
- Advanced Energy Metering

Circular performance	Resource performance	Well-being performance

With the addition of digital modules, the circuit breaker can be upgraded and modernized at any time after installation without disrupting electrical service.

Better durability with improved mechanical and electrical performance along with remote monitoring to help facilitate predictive maintenance.

The embedded class 1 metering allows active power and energy to be monitored, helping facility managers reduce their CO_2 emissions and energy costs when connected to any building and energy management system.

MasterPact MTZ is fully RoHS and REACH compliant.

Life Is On | Schneider Electric

Order your Master**Pact** MTZ through digital tools

Product selector

To simplify and expedite the ordering of MasterPact MTZ, four new tools are introduced:
■ **Product selector:** An online software tool embedded in Schneider website or in distributor´s website to help selecting the right product with its accessories.
■ **Product Code**: An alphanumeric code representing the selection of a MasterPact MTZ circuit breaker. It simplifies the way to communicate the selection of a MasterPact MTZ circuit breaker during ordering, sharing information and asking for help remotely.
■ **MySE:** online ordering plateform of Schneider for partners, offering most of our products.
■ **GoDigital store**: An online market place to purchase Digital Modules 24/7. It allows upgrading of MasterPact MTZ at anytime.

Product selector

Product Selector aims at providing a fast, secure and smart way of selecting products. It includes the selection of the basic frame, control unit, accessories and Digital Modules. Compared with the traditional way of filling up order forms or specifying customer functions, it brings the following benefits:

- Easy access: no login, direct access on Schneider website or on distributor´s website
- Reliable: compatibilities between core product and accessories are constantly tested
- Wide coverage: more than 130 ranges from Schneider are available (MasterPact, ComPact, TeSys, Acti 9, Altivar…)

Yesterday,

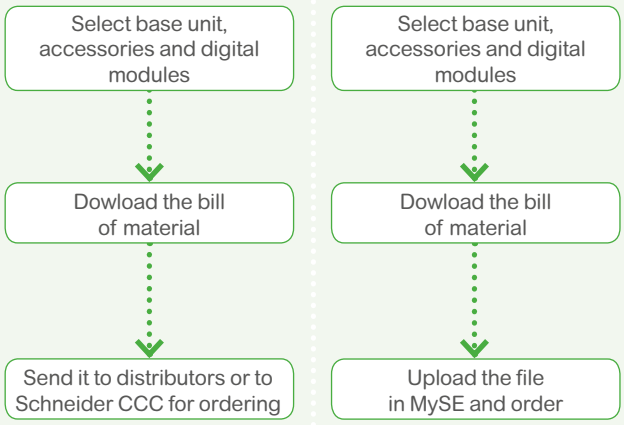
Today,

Ordering process of Master**Pact** MTZ with Product Selector

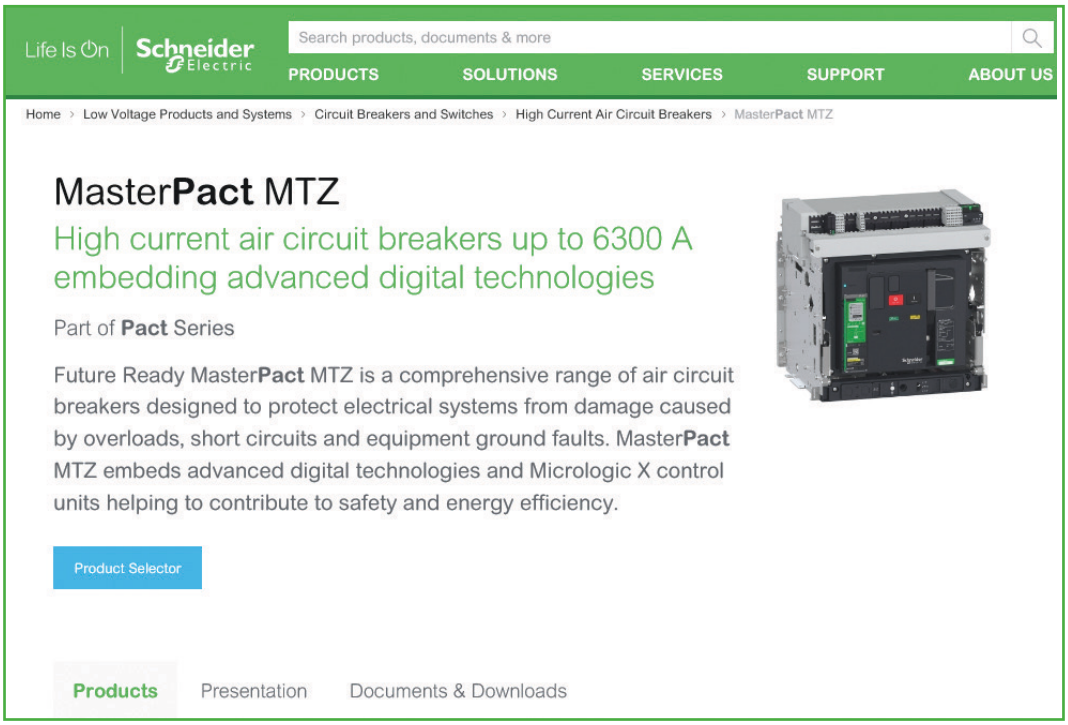


[1] Will be live in January 2019.

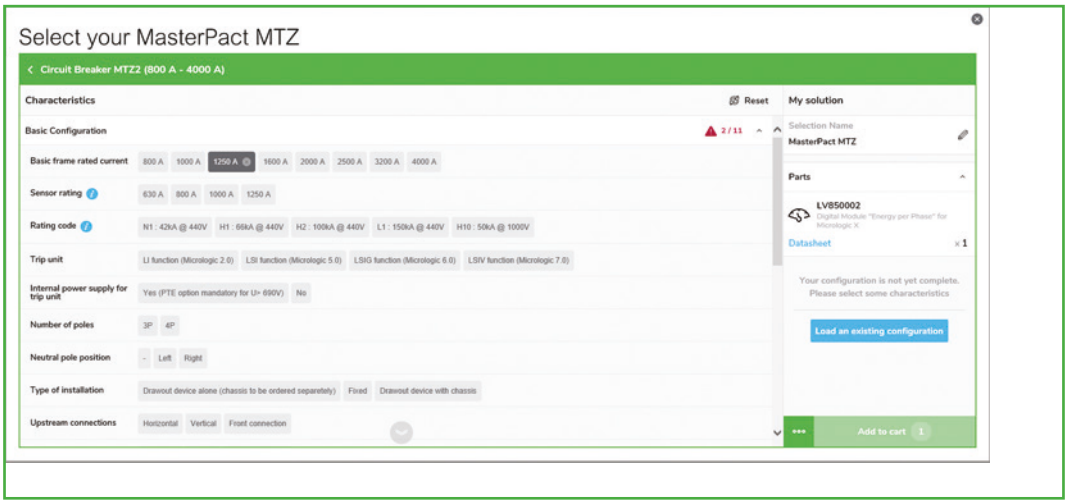
Order your Master**Pact** MTZ through digital tools

Product selector

Go on the range page on www.se.com



Clic on «product selector» and run your selection



Note: All selections are encouraged to be done in Product Selector. If you have difficulties accessing or using Product Selector, contact Schneider Electric Customer Care Centre or your Schneider Electric sales representatives for more information about MTZ ordering.

Order your Master**Pact** MTZ through digital tools

Master**Pact** MTZ Product Code

MasterPact MTZ Product Code is an alphanumeric code representing the complete selection of a MasterPact MTZ circuit breaker. It will be automatically generated for each MasterPact MTZ circuit breaker after completing the selection through Product Selector. It will appear in the invoice and delivery documents as well as the labelling on the MasterPact MTZ circuit breaker and the packaging.

MasterPact MTZ Product Code brings the following benefits:

- Quick and unique identification of the initial selection of a circuit breaker can be achieved by reading the code on the physical products or
- other recordings
- Reordering of the same MasterPact MTZ circuit breaker is simplified by communicating selection through product code
- Recording or sharing information about the initial selection of a circuit breaker is simplified
- Details of the coding rules can be accessed through CCC and there are some of the highlights:
- All options of accessories are coded.
- The minimum length of the code is 9 characters and the maximum length of the code is 33* characters depending on the choice of the accessories.
- Capital letters, numbers and start sign [1] are used.

[1] The maximum length of the code may change due to future enrichment of the offer.

An example of MasterPact MTZ product code

- MasterPact type: MTZ2
- Rating: 1000A
- Sensor rating: 800A
- Performance Level: H1
- MicroLogic: 5.0 X
- VPS module: Yes
- Number of poles: 4P
- Type of installation: Drawout with chassis
- Connection: Top Horizontal Bottom Horizontal
- Type of communication: ULP + EIFE without I/O module
- Accessories for Design & Installation simplification and operation efficiency: No
- Accessories for People and Property Safety: No
- Digital Modules: Energy per phase

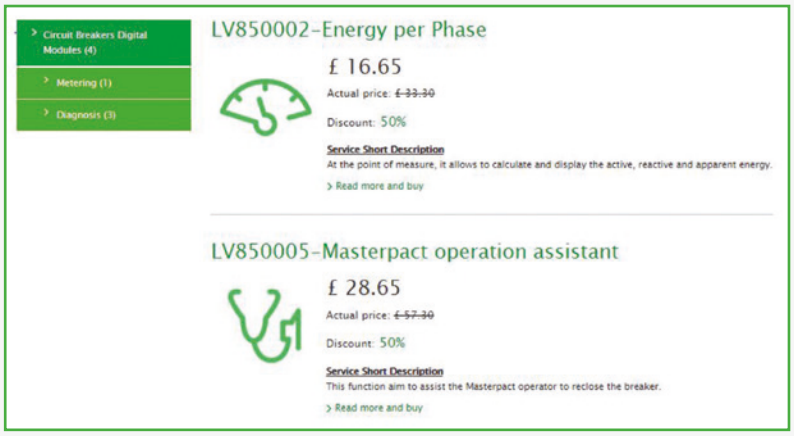
GoDigital store

> Go to GoDigital store

GoDigital is the Schneider Electric store that allows you to purchase Digital Modules for MasterPact MTZ control unit MicroLogic X that is already installed in the MasterPact MTZ. It provides different Digital Modules to customize your control unit with optional protection, measurement and Maintenance & diagnostics functionalities. It is open 24/7. With GoDigital store, Panel Builders have the flexibility to further customize the MicroLogic X features at last minute before commissioning the switchboard. Electrical contractors and facility managers can upgrade the install base during operational phase of product life cycle, according to new requirements, anytime, without changing the hardware or disrupting operations.

Note: Changing the protection functions among LI (MicroLogic 2.0 X), LSI (MicroLogic 5.0 X), LSIG (MicroLogic 6.0 X) and LSIV (MicroLogic 7.0 X) requires changing the MicroLogic X.



Each Digital Module purchased is delivered with a software license for a unique MicroLogic X control unit and can only be installed on that particular MicroLogic X. Therefore, the MicroLogic X control unit serial number needs to be preregistered in the GoDigital platform for the first time purchase.

For the first purchase for a particular Micorlogic X, three ways are available:

1) EcoStruxure Power Commission

When connected to MicroLogic X through either USB connection or IFE/EIFE connection, EcoStruxure Power Commission can read the unique serial number* and identify the MicroLogic X. It will also show all the available Digital Modules which are compatible with the MicroLogic X firmware version. When clicking “Buy”, it will direct the user to GoDigital store PC version with the MicroLogic X serial number automatically registered in it.

2) Ecostruxure Power Device App

When connected to MicroLogic X through either Bluetooth connection or NFC connection, Ecostruxure Power Device App will identify the MicroLogic X and proposes available Digital Modules. When clicking “Purchase”, it will direct the user to GoDigital store mobile version with the MicroLogic X serial number automatically registered in it.

3) GoDigital store PC version

In the section”My assets”, choose the serial number of the MicroLogic X to be upgraded and purchase the additional Digital Modules.

https://godigital.schneider-electric.com/

Note:

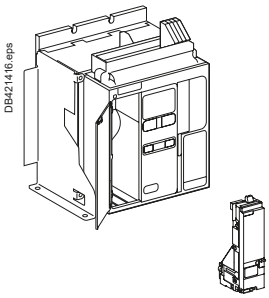
- Please note that GoDigital platform is only used to purchase Digital Modules for MicroLogic X which is already installed.
When ordering a new circuit breaker, Digital Modules are selected in Product Selector and installed in factory before delivered.
- The serial number is also printed on the faceplate of MicroLogic X

MTZ1 06 to MTZ1 16 fixed circuit breakers

Circuit breakers

A MasterPact fixed circuit breaker is described by 4 catalog numbers corresponding to:
- the basic circuit breaker
- a control unit
- a top connection
- a bottom connection.

A communication option and various auxiliaries and accessories may also be added.



Basic circuit breaker

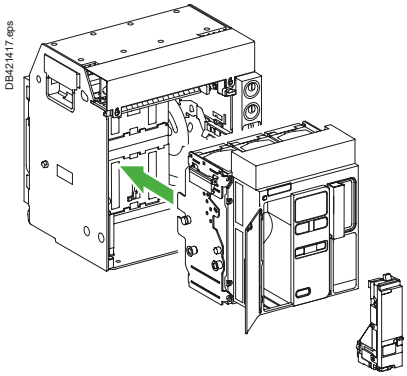
MTZ1 06 to MTZ1 16 drawout circuit breakers

Circuit breakers

A MasterPact drawout circuit breaker is described by minimum 5 catalog numbers corresponding to:

- the basic circuit breaker
- a control unit
- a chassis with standard terminal blocks
- a top connection
- a bottom connection.

A communication option and various auxiliaries and accessories may also be added.



Basic circuit breaker

MTZ1 06 to MTZ1 16 drawout circuit breakers

Circuit breaker and connections

Chassis terminal blocks

Standard terminal blocks

Each chassis comes equipped in standard with the terminal blocks corresponding to the customer functions below:

- the basic device : OF1, OF2, OF3, OF4, SDE1, UC3 (UC3 for 3P chassis only, not for 4P)
- the MicroLogic control unit : UC1, UC2
- the 5 most common accessories : MN/MX2, MX1, XF, PF, MCH.

Additional terminal blocks

If the device is equipped with one or a combination of the following 3 additional accessories:

- SDE2/RES
- M2C/ESM
- PTE

all the necessary chassis terminal blocks are coded by one of the part numbers below :

Chassis terminal block for PTE	**LV839461**
Chassis terminal block for SDE2	**LV839462**
Chassis terminal blocks for PTE + SDE2	**LV839463**
Chassis terminal block for M2C/ESM	**LV839464**
Chassis terminal blocks for SDE2 + M2C/ESM	**LV839465**

Ethernet communication option

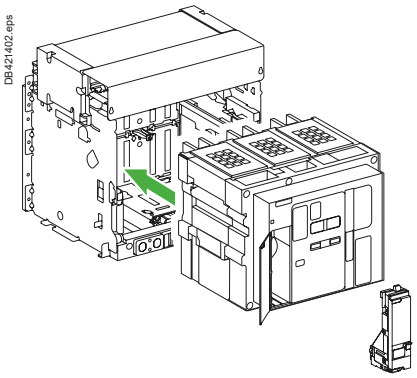
MTZ2 08 to MTZ3 63 drawout circuit breakers

Circuit breakers

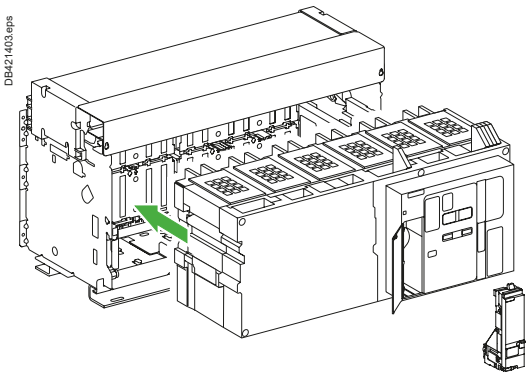
A MasterPact drawout circuit breaker is described by minimum 5 catalog numbers corresponding to:

- the basic circuit breaker
- a control unit
- a chassis with standard terminal blocks
- a top connection
- a bottom connection.

A communication option and various auxiliaries and accessories may also be added.



Basic circuit breaker + chassis ≤ 4000 A



Basic circuit breaker + chassis ≥ 4000 A

[1] Select a 4P basic circuit breaker with neutral on the right page I-42.
All other catalog numbers are unchanged.

Chassis terminal blocks

Standard terminal blocks

Each chassis comes equipped in standard with the terminal blocks corresponding to the customer functions below:

- the basic device : OF1, OF2, OF3, OF4, SDE1, UC3 (UC3 for 3P chassis only, not for 4P)
- the MicroLogic control unit : UC1, UC2
- the 5 most common accessories : MN/MX2, MX1, XF, PF, MCH.

Additional terminal blocks

If the device is equipped with one or a combination of the following 5 additional accessories:

- SDE2/RES
- M2C/ESM
- PTE
- 1st additionnal 4 OF block
- 2nd additionnal 4 OF block

all the necessary chassis terminal blocks are coded by one of the part numbers below :

Chassis terminal blocks for 8 OF contacts	**LV839471**
Chassis terminal blocks for 4 OF contacts	**LV839472**
Chassis terminal block for PTE	**LV839473**
Chassis terminal blocks for PTE + 8 OF contacts	**LV839474**
Chassis terminal blocks for PTE + 4 OF contacts	**LV839475**
Chassis terminal block for SDE2/RES	**LV839476**
Chassis terminal blocks for SDE2/RES + 8 OF contacts	**LV839477**
Chassis terminal blocks for SDE2/RES + 4 OF contacts	**LV839478**
Chassis terminal blocks for PTE + SDE2/RES	**LV839479**
Chassis terminal blocks for PTE + SDE2/RES + 8 OF contacts	**LV839480**
Chassis terminal blocks for PTE + SDE2/RES + 4 OF contacts	**LV839481**
Chassis terminal block for M2C/ESM	**LV839482**
Chassis terminal blocks for M2C/ESM + 8 OF contacts	**LV839483**
Chassis terminal blocks for M2C/ESM + 4 OF contacts	**LV839484**
Chassis terminal blocks for PTE + M2C/ESM	**LV839485**
Chassis terminal blocks for PTE + M2C/ESM + 8 OF contacts	**LV839486**

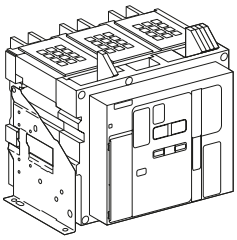
MTZ2 08 to MTZ3 63 fixed switch-disconnectors

Switch-disconnectors

A MasterPact fixed switch-disconnector is described by 3 catalog numbers corresponding to:
- the basic switch-disconnector
- a top connection
- a bottom connection.

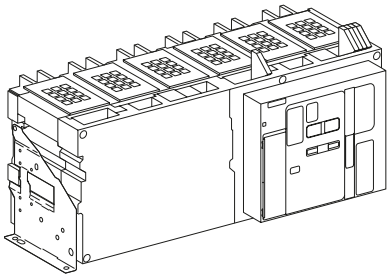
Various auxiliaries and accessories may also be added.

DB421411.eps



Basic switch-disconnector ≤ 4000 A.

DB421412.eps



Basic switch-disconnector ≥ 4000 A.

MTZ2 08 to MTZ3 63 drawout switch-disconnectors

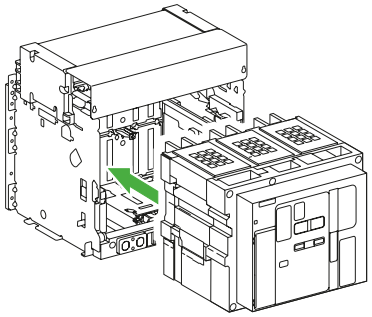
Switch-disconnectors

A MasterPact drawout switch-disconnector is described by minimum 4 catalog numbers corresponding to:

- the basic switch-disconnector
- a chassis with standard terminal blocks
- a top connection
- a bottom connection.

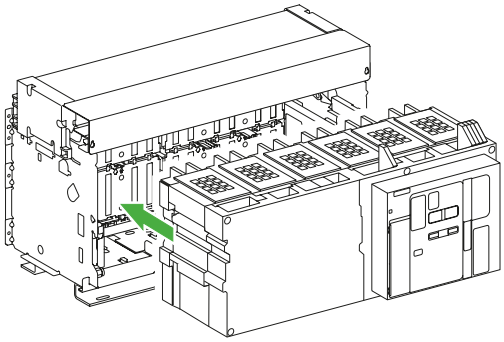
Various auxiliaries and accessories may also be added.

DB421413.eps



Basic switch-disconnector + chassis ≤ 4000 A.

DB421414.eps



Basic switch-disconnector + chassis ≥ 4000 A.

Chassis terminal blocks

Standard terminal blocks

Each chassis comes equipped in standard with the terminal blocks corresponding to the customer functions below:

- the basic device : OF1, OF2, OF3, OF4, SDE1, UC3 (UC3 for 3P chassis only, not for 4P)
- the MicroLogic control unit : UC1, UC2
- the 5 most common accessories : MN/MX2, MX1, XF, PF, MCH

Additional terminal blocks

If the device is equipped with one or a combination of the following 5 additional accessories:

- SDE2/RES
- M2C/ESM
- PTE
- 1st additionnal 4 OF block
- 2nd additionnal 4 OF block

all the necessary chassis terminal blocks are coded by one of the part numbers below :

Chassis terminal blocks for 8 OF contacts	**LV839471**
Chassis terminal blocks for 4 OF contacts	**LV839472**
Chassis terminal block for PTE	**LV839473**
Chassis terminal blocks for PTE + 8 OF contacts	**LV839474**
Chassis terminal blocks for PTE + 4 OF contacts	**LV839475**

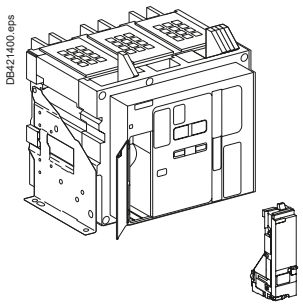
MTZ2 08 to MTZ2 40 - 1150 V AC
Fixed circuit-breakers

A MasterPact 1150 V AC fixed circuit breaker is described by 4 catalog numbers corresponding to:
- the basic circuit breaker
- a control unit
- a top connection
- a bottom connection.

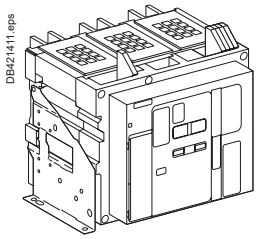
A communication option and various auxiliaries and accessories may also be added.



Basic circuit breaker ≤ 4000 A.

A MasterPact 1150 V AC fixed switch-disconnector is described by 3 catalog numbers corresponding to:
- the basic switch-disconnector
- a top connection
- a bottom connection.

Various auxiliaries and accessories may also be added.



Basic switch-disconnector ≤ 4000 A.

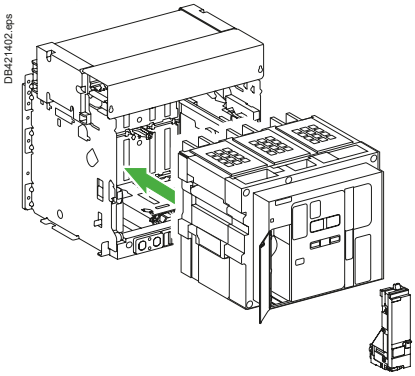
MTZ2 08 to MTZ2 40 - 1150 V AC

Drawout circuit breakers and switch-disconnectors

A MasterPact 1150 V AC drawout circuit breaker is described by 5 catalog numbers corresponding to:
- the basic circuit breaker
- a control unit
- a chassis
- a top connection
- a bottom connection.

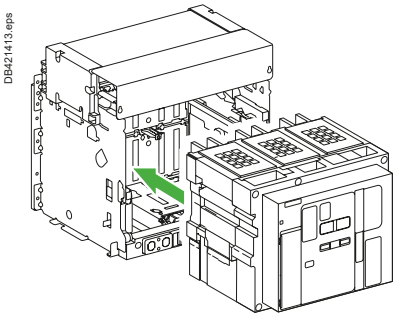
A communication option and various auxiliaries and accessories may also be added.
For all MTZ2 H10 draw-out up to 3200 A, the utilization of interphase barriers is recommended. For MTZ2 40 H10 draw-out, only vertical terminals can be used. Interphase barriers are recommended.



Basic circuit breaker + chassis ≤ 4000 A

A MasterPact 1150 V AC drawout switch-disconnector is described by 4 catalog numbers corresponding to:
- the basic switch-disconnector
- a chassis
- a top connection
- a bottom connection.

A communication option and various auxiliaries and accessories may also be added.
For all MTZ2 HA10 draw-out up to 3200 A, the utilization of interphase barriers is recommended. For MTZ2 40 HA10 draw-out, only vertical terminals can be used. Interphase barriers are recommended.



Basic switch-disconnector + chassis ≤ 4000 A

4000 A	**LV848396**	**LV848408**

Chassis terminal blocks

Standard terminal blocks

Each chassis comes equipped in standard with the terminal blocks corresponding to the customer functions below:

- the basic device : OF1, OF2, OF3, OF4, SDE1, UC3 (UC3 for 3P chassis only, not for 4P)
- the MicroLogic control unit : UC1, UC2
- the 5 most common accessories : MN/MX2, MX1, XF, PF, MCH.

Additional terminal blocks

If the device is equipped with one or a combination of the following 5 additional accessories:

- SDE2/RES
- M2C/ESM
- PTE
- 1st additionnal 4 OF block
- 2nd additionnal 4 OF block

all the necessary chassis terminal blocks are coded by one of the part numbers below :

Chassis terminal blocks for 8 OF contacts	**LV839471**
Chassis terminal blocks for 4 OF contacts	**LV839472**
Chassis terminal block for PTE	**LV839473**
Chassis terminal blocks for PTE + 8 OF contacts	**LV839474**
Chassis terminal blocks for PTE + 4 OF contacts	**LV839475**
Chassis terminal block for SDE2/RES	**LV839476**
Chassis terminal blocks for SDE2/RES + 8 OF contacts	**LV839477**
Chassis terminal blocks for SDE2/RES + 4 OF contacts	**LV839478**
Chassis terminal blocks for PTE + SDE2/RES	**LV839479**
Chassis terminal blocks for PTE + SDE2/RES + 8 OF contacts	**LV839480**
Chassis terminal blocks for PTE + SDE2/RES + 4 OF contacts	**LV839481**
Chassis terminal block for M2C/ESM	**LV839482**
Chassis terminal blocks for M2C/ESM + 8 OF contacts	**LV839483**
Chassis terminal blocks for M2C/ESM + 4 OF contacts	**LV839484**
Chassis terminal blocks for PTE + M2C/ESM	**LV839485**
Chassis terminal blocks for PTE + M2C/ESM + 8 OF contacts	**LV839486**
Chassis terminal blocks for PTE + M2C/ESM + 4 OF contacts	**LV839487**
Chassis terminal blocks for SDE2/RES + M2C/ESM	**LV839488**
Chassis terminal blocks for SDE2/RES + M2C/ESM + 8 OF contacts	**LV839489**
Chassis terminal blocks for SDE2/RES + M2C/ESM + 4 OF contacts	**LV839490**
Chassis terminal blocks for PTE + SDE2/RES + M2C/ESM	**LV839491**
Chassis terminal blocks for PTE + SDE2/RES + M2C/ESM + 8 OF contacts	**LV839492**
Chassis terminal blocks for PTE + SDE2/RES + M2C/ESM + 4 OF contacts	**LV839493**
